ABOUT US

Karub is a leading company in the global supply of equipment and raw materials for the construction, energy, oil, and gas industries. With its extensive global network and strong supply chain, it provides the best solutions to its partners. Headquartered in Turkey, Karub operates globally with offices in the UK, China, UAE, and Turkmenistan, offering strategic solutions and logistical support to meet regional demands, particularly in Central Asia. Through turnkey contracting operations and deep expertise, Karub reinforces its leadership. Additionally, its collaborations with public institutions further strengthen its industry experience.

Providing comprehensive services such as engineering, procurement, construction, and operational support, Karub delivers effective solutions at every stage of industrial projects, helping business partners maximize operational efficiency.

With 12 years of experience, an entrepreneurial spirit, and strong global supply chain references, Karub successfully meets both technical and commercial needs.

GLOBAL SUCCESS

Karub is a leading company operating globally in the energy, foreign trade, and construction sectors. By providing comprehensive support to its stakeholders in expanding their international business, it manages the implementation processes of projects in Central Asia through its supplier network in China, the UAE, and Europe. While offering project design and engineering services at its headquarters in Turkey, it strengthens its global business network through its London office. With a highly qualified team of engineers, Karub ensures that production processes are efficient and feasible on a global scale. It adheres to international quality standards in public procurement and other commercial activities, aiming to maximize profitability in projects.

Karub provides reliable support to business partners seeking to adapt to dynamic market conditions in their operational transformation processes. By utilizing state-of-the-art equipment to enhance efficiency and supplying spare parts and consumables, it ensures uninterrupted operations and secures long-term success.

GROWTH PROCESS

Karub was established in 2013 at the Dubai Multi Commodities Centre (DMCC) to trade oil and gas. Since its inception, it has strengthened its position by expanding its global trade network.

In 2021, to further grow its operations in Turkey, Karub entered a licensing process aimed at achieving international standards, sustainability, and long-term success in foreign trade, energy, and construction. This step was taken to enhance its global market presence and quality.

By 2022, having successfully completed the licensing process, Karub relocated its headquarters to Istanbul, continuing its operations at full speed. Today, it creates added value with innovative and sustainable solutions in global supply chain, energy, and construction sectors.

FOREIGN TRADE

Karub provides comprehensive supply chain management services to enhance efficiency, reduce costs, and optimize operations. The company offers sector-specific expertise in critical processes such as supplier selection, procurement planning, customs clearance, warehousing, certification, and regulatory compliance.

It successfully conducts commercial activities with public institutions, particularly in Uzbekistan, Turkmenistan, and Azerbaijan. With its extensive trade network and expert team, Karub delivers highly efficient, optimized supply chain solutions. These strategic approaches are designed to ensure cost savings and improve overall supply chain efficiency.

ENERGY

Founded in 2013, Karub Energy aims to be a leading player in the energy sector through its extensive trade network and strong partnerships. Specializing in key areas such as crude oil infrastructure development, energy transmission line construction, and alternative electricity infrastructure installation, Karub operates in close coordination with its construction division. With solid partnerships and strategic agreements both domestically and internationally, the company provides effective solutions across various energy sectors, striving for growth in the global market.

CONSTRUCTION

Karub strengthens its strong presence in the industry with sustainable and modern projects across a wide geography, particularly in Central Asia. By utilizing modern technologies with maximum efficiency, it prioritizes quality and safety in energy, infrastructure, superstructure, and industrial facility projects.

With a professional management team and specialized experts, projects are successfully completed without compromising time or quality. Beyond meeting energy demands, Karub enhances public spaces by constructing high-quality buildings, improving existing structures through modernization projects, and providing sustainable energy solutions to improve societal living standards.

Additionally, through turnkey projects, Karub ensures a comprehensive, reliable, and seamless delivery at every stage for its business partners.

R&D

Yıldız Technical University (YTÜ) and Karub are developing innovative R&D and Product Development projects through a university-industry collaboration with internationally accredited laboratory capabilities. A team of academic experts forms the scientific foundation of these projects, while the provided accreditations and project support encourage innovation.

This partnership contributes to the development of new product designs and prototypes, offering quick solutions to industrial needs and enabling the company to gain a competitive edge in the market. With continuous innovation and improvement efforts, the collaboration between Karub and YTÜ strengthens, leading to the creation of products that add value to the industry.

SUSTAINABILITY

With a mission to preserve the energy of tomorrow, Karub adopts a sustainable, safe, and environmentally friendly approach. As a signatory of the United Nations Global Compact, it prioritizes diversity, sustainability, and resilience in all its operations. Embracing the principle of equality regardless of culture, belief, ethnicity, or gender, Karub operates globally with a respectful and responsible business mindset toward society.

INNOVATION

Through coordinated efforts in the field of biomedical engineering at the Istanbul headquarters and the Istanbul and London Technology Parks, we develop groundbreaking solutions in sustainable technology for R&D projects. With our expert team, we integrate innovative ideas into our projects in line with the latest technological advancements.

COMMUNITY

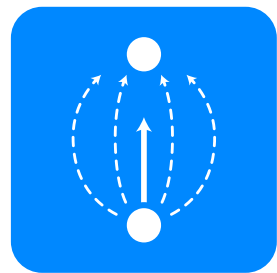

Our permanent goal is to add value to our community and provide maximum support for their needs, not only by successfully completing our activities with our strong and effective team but also by adopting a solution-oriented approach in every step. We are committed to serving the development and well-being of our

ENVIRONMENT

The latest scientific advancements are integrated into projects to enhance energy efficiency. Every step is taken with an environmentally friendly approach, strengthening our commitment to a green future through new projects. By obtaining eco-friendly certifications such as ISO 50001:2018 and Green Stars, we reduce carbon emissions in biomedical engineering project processes and actively contribute to a sustainable future.
